

Electrophoresis and Liquid Chromatography Laboratory Specialist

SCOPE

To face our constant growth, we are currently actively looking for an **Electrophoresis and Liquid Chromatography Laboratory Specialist**

You will work on **innovative biopharmaceutical products** under development (preclinical and clinical phases).

You will be part of a team involved in projects outsourced by our clients

Those projects are related to the development, validation and/or application of analytical methods based on a protocol for the characterisation and quality control of biomolecules.

YOUR MISSION

You will report to the Technical Leader Chromatography

You will be part of a team of 5/6 people

In this role you will be accountable for

- Performing daily laboratory activities related to either development or validation or application of analytical methods and/or stability studies management
 - Performing analyses
 - Processing data
 - Writing reports and associated supporting documents
 - Presenting/discussing results

Depending on your level of autonomy, you could also be accountable for activities such as

- Validation of raw data
- Training team members and others on technical skills
- Taking part in the writing/preparation of protocols
- Supporting audits and investigations

PROFILE

Scientific background

Required

- Relevant working experience with one of the following techniques
 - Capillary electrophoresis and Gel electrophoresis
 - Liquid chromatography (purification, analytical, ...)
- Relevant experience working with proteins

- Experience in development, validation and/or application of analytical methods
- Knowledge of softwares such as empower, chemstation, chromeleon
- Ability to work in a regulated environment
- Good team spirit
- Fluent in French

Plus

- Experience in working with antibodies
- Relevant working experience in the pharmaceutical industry in a **GMP** environment
- Good command of English (spoken and written)
